

## What is an Area Wide Control Program (AWCP) ?

● Thailand Trial Area -136 Acres ●

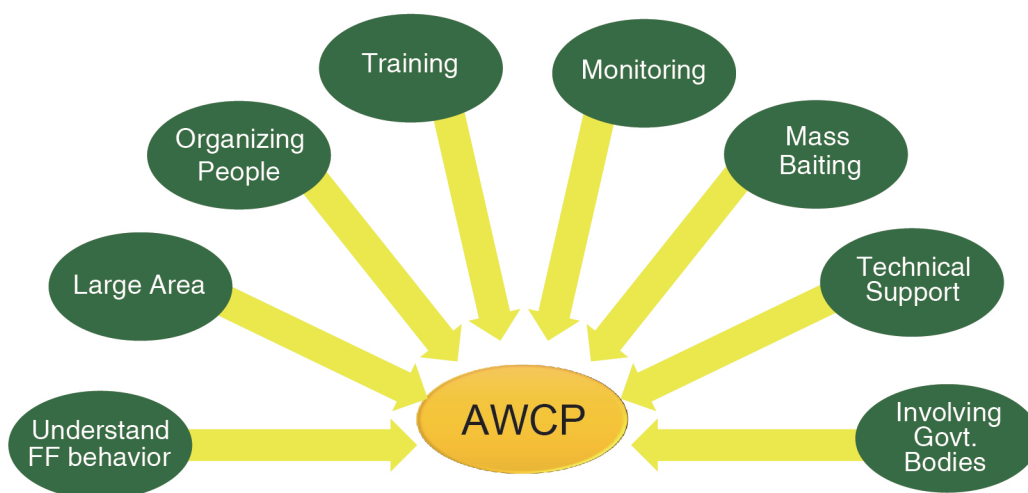

It is an integrated and systematic program using our GREAT® Fruit Fly Bait (GFFB) for Fruit Fly Control (FFC) in large areas.

It includes several stages to achieve the required results with high standards of fruit fly control.

It aims to drastically bring down the fruit fly population in the trial area before their peak activity time, thereby reducing the fruit damage rate.

This is designed by understanding the behavior of fruit flies, which is the key to finding the right methodology for controlling them.

## What is an Area Wide Control Program (AWCP) ?

### AWCP with the Support of a Strong Local Partner:

Always working for the betterment of the end-user and looking for a long term solution for fruit fly control.

Has local connections with Government or Agricultural organizations.

Sound knowledge about the local regulatory norms.

Implements our AWCP protocol in the most systematic & organized way.

**We believe, apart from the product & its technology, it is very crucial to collaborate with the right partner to win this battle against Fruit flies.**

What we <b>PROVIDE</b>	What we <b>NEED</b>
Systematic Planning and Organizing	100 acre trial plot, picture of the trial area
Competitive & Affordable Pricing for Products (attractive discounts for the first trial)	Funding for the discounted products
Education & Training materials/Technical Plan for trial in English, Chinese	Translation of education & training materials in local language
Training programs	List of participant details, support in organizing meetings with them
Strong Technical support by team of experts' till end of the trial	Bear local expenses for expert during his stay
Handle logistics in China	Handling logistics and storage at local level
Support for liaising with Govt. bodies	Arrange meeting with potential stakeholders/government officials
Documentation support for regulatory compliance like product registration	Product registration for marketing and distribution
