

Why AWCP?

Why AWCP for Fruit Fly Control?

 AWCP is the most effective and economic way to control fruit flies by reducing the fruit damage rate.

 Covering large areas helps in drastically bringing down the fruit fly population, in spite of their peculiar characteristics.

AWCP brings together all the stakeholders involved in the business.

That leads to a systematic approach in planning and organizing at a large scale.

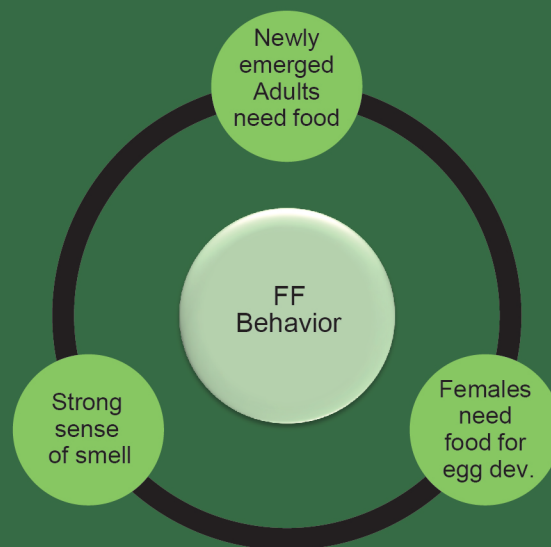

Why AWCP by Mass Baiting(MB)?

It largely depends on the behavior of the fruit flies. They have a tendency to look for food right after emergence for their development, especially the immature female flies who have a stronger desire for protein food so they can develop their eggs.

So, hydrolyzed protein acts as the best and effective attractant to lure them right after emergence.

Why AWCP?

Why AWCP through MB using GFFB?

Our philosophy for successful FFC

Good Product

- GREAT® Fruit Fly Bait

Good Organization

- Stakeholders

Innovative Methodology

- Area Wide Control Program by Mass Baiting.

All of the above comes as a package while implementing an AWCP
